

WE NETWORK LLC

Bridging Gaps, Building Networks

ABOUT US

WE NETWORK LLC has enhanced expertise that can deliver networks for 2G, 3G, 4G and 5G which helps create the best value for the customer. Deployment of new, advanced wireless networks requires a deep understanding of all segments of network planning, design, & optimization.

Our key service offerings revolve around Network and Networkrelated services for both the Telecom's service providers and the Original equipment manufacturers

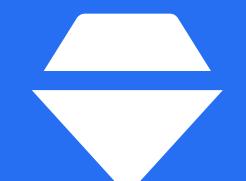

OUR VISION

To be the prime Service & Solutions provider in the telecom domain.

OUR MISSION

Deliver quality solutions and services and build up a great working environment managed by a professional team

OUR VALUES

- Integrity
- Quality of service
- Transparency Privacy of Client Information
- Integrating Social values into operation

OUR SERVICES

Turnkey Telecom projects division is our Flagship division. In less than a decade. WENET has built an enviable track record in executing very large telecom projects for leading telecom service providers in the region.

Having consolidated our solutions offering in the telecom network design and implementation, we have expanded our operations into related domains of enterprise communications and alternative energy solutions. The company's operations are structured into 4 divisions.

01 **Telecom Network
and Infrastructure
solutions**

02 **Enterprise
IT solutions**

03 **MEP solutions**

04 **Oil and Gas service**

TELECOM SERVICES

At We Network, we offer comprehensive turnkey infrastructure solutions for network sites, catering to a wide range of requirements. Our services encompass the supply and installation of various tower types, including:

- ✓ GBT Towers
- ✓ Monopoles Towers
- ✓ Camouflage Towers
- ✓ Wall-Mounted Poles
- ✓ Self-Supporting - Non-Penetrating Poles for Roof-Top Sites COW, GRDS

One of our specialized offerings is the service of camouflaged monopoles designed as artificial PALM TREES and PINE TREES. These camouflaged structures seamlessly blend into the surrounding environment, providing aesthetic appeal while maintaining robust antenna loading capabilities.
